

Linking to Omni Records

Instructions

You can link to the record of a book, article, or other item in the Omni catalogue by using Omni's Permalink feature.

You need to use the Permalink feature for successful links. If you just copy the URL from your browser bar it will not work.

Do a search for the item in Omni. Once you find it, either click on the item's record to see the full details, or click on the 3 dots at the top of the record.

Under Send To in the full record, or at the bottom of the record, click on Permalink.

A permanent URL will appear in a text box. Copy it and use it to link directly to the record in Omni.
